

Invasive Plant Training

Early Detection

Orange County CNPS training for early detection of high priority non-native invasive plants

Focused training for volunteers, land managers, stewardship groups, agency staff and others

Extensive classroom instruction by CNPS experts, with optional Calflora training

Detailed identification of Orange County's highest priority invasive plant species

Participants will

- Learn to identify the highest priority invasive species in Orange County.
- Learn what to do when they cannot identify a species.
- Learn what to do and how to communicate an invasive detection.
- Learn if detection is new, important or needs to be communicated.
- Learn where to look for new invasives.
- Learn how to avoid spreading more invasives.

Optional introductory Calflora training
